

## **Nokia Siemens Networks, Ubidyne In Active Antenna Cooperation**

August 14, 2008

Edited Press Release

**STOCKHOLM -(Dow Jones)- Nokia Siemens Networks and Ubidyne, a digital radio technology firm, said Thursday they have agreed on cooperation to enhance NSN's Flexi Base Station solution with Ubidyne's innovative active antenna product.**

**The active antenna technology integrates the functionality of active radio frequency parts of a base station and a passive antenna into one enclosure.**

**It is connected to Nokia Siemens Networks' Flexi base station running OBSAI standard interface.**

**The solution based on a platform capable of supporting multiple standards (GSM/WCDMA/LTE/WiMAX) protects operator investment and reduces OPEX by decreasing installation, site rental, maintenance and energy costs.**

**The solution is targeted to operators rolling out new 3G or LTE (Long Term Evolution) networks or enhancing their existing 3G networks, and those planning to gradually phase out GSM to make space for WCDMA/LTE.**
